# geoXMF announces release of XMF Alerter™ Version 2.5 enterprise GIS performance software.

**Longmont, CO, October 30, 2009** --- geoXMF LLC announced today the newest version of its industry-leading enterprise GIS performance monitoring and management software XMF Alerter™ Version 2.5.

Benefits of the new version include:

- **Support for ArcGIS Direct Connect**  
XMF Alerter now allows you to set up monitoring for SDE availability via ESRI's Direct Connect support for Oracle, SQL Server and DB2. Alerts will fire when the SDE connection is interrupted so that you can proactively address the issue.
- **Remote batch (file initiation) script support**  
This improvement allows managers to remotely run scripts to manage ArcGIS Server services. For example, to restart services via a batch script.
- **XML API for Alert status**  
With this API the status of all alerts is available via a URL or "web service" which responds with XML. Using this web service, the Alerter can be integrated with other desktop applications or other web-based applications - such as an existing enterprise dashboard.

This latest version of XMF Alerter™ is available for download and evaluation at [www.geoxmf.com](http://www.geoxmf.com).

XMF Alerter™ is a complete enterprise performance monitoring and alerting solution for ESRI GIS. XMF Alerter™ integrates with and enhances ESRI's industry-standard GIS

architecture to deliver a comprehensive tool to improve overall IT efficiency and productivity.

Campbell County, WY and City & County of Honolulu join a growing list of geoXMF clients, including The Nature Conservancy, City of Zurich, Deere & Company, Tallahassee –Leon County GIS, Honolulu Board of Water Supply, Providence Water Supply Board and United Power among others.

### **About geoXMF**

geoXMF LLC is a leader in real-time GIS monitoring and services. geoXMF's industry leading technology integrates with ESRI® Internet mapping software and is used by organizations including transportation, agriculture, water and wastewater utilities, power distribution and local/regional governments. geoXMF provides products that enable GIS professionals to effectively manage their spatial enterprise and proactively monitor the key components of their GIS technology stack.

The company's XMF Alerter™ software responds to the growing need for organizations world-wide to maximize GIS performance and reliability. For more information, please visit our website: [www.geoxmf.com](http://www.geoxmf.com)
