geoXMF Announces XMF Accelerator

Google-like search delivers map information in seconds

Longmont, CO, November 5, 2008 --- geoXMF LLC, an enterprise GIS performance company, announced today the release of XMF Accelerator, a commercial off-the-shelf, web-based software tool for simple, easy and fast enterprise GIS search and data access.

“Geospatial applications are becoming more and more pervasive in business and public-facing applications,” said Doran Geise, geoXMF Vice President. “Today GIS is expected to provide world-class performance across the enterprise. XMF Accelerator delivers Google-like search for enterprise GIS – simple, easy and lightning fast access to GIS data.”

“As GIS users, we think “map” first – we understand them intuitively. However, many folks are not GIS or map savvy and even those that are don’t necessarily want to work “through” a map even if the end data piece they want is a map,” said Geise.

XMF Accelerator bypasses the typical map viewer first interface and presents a simple, convenient search box. Users can enter search terms and keywords to instantaneously get a listing of hyperlinks to feature locations fitting their search terms. Clicking on the hyperlink immediately delivers a map view with an appropriate display scale using a predefined bounding box.

XMF Accelerator delivers the following benefits to enterprise GIS users:

- **Fast** - Lightning fast access to geographic data for IT/GIS executives, technical managers and field staff.
- **Easy for non-GIS users** - simple, familiar search term box and quick access to maps instantly broadens use of enterprise GIS data by non-technical users and public.
- **Reduces bandwidth demand and request load for the server** - eliminates the multiple “navigation” requests (pan, zoom-in, pan, zoom-in) that result in a map-viewer-first search approach.

- **Easy out-of-the-box functionality** - Accelerator comes with its own GIS viewer that you can deploy as-is or customize. You can also embed XMF Accelerator into other applications to enable them for fast GIS search.
- **Increased Productivity** - faster and easier access to GIS data for decision-making.

XMF Accelerator is available now for ESRI Enterprise GIS systems at ww.geoxmf.com.

About geoXMF

geoXMF LLC is a leader in enterprise GIS performance software and services. geoXMF's industry leading technology integrates with ESRI® Internet mapping software and is used by organizations including transportation, agriculture, water and wastewater utilities, power distribution and local/regional governments. geoXMF provides products that enable GIS professionals to effectively manage their spatial enterprise and proactively monitor and enhance the key components of their GIS technology stack.

The company's XMF Alerter and XMF Accelerator software responds to the growing need for organizations world-wide to maximize GIS reliability, usability and performance. For more information, please visit our website: www.geoxmf.com
