Nimsoft welcomes geoXMF as a Unified Monitoring Alliance Partner

Longmont, CO, November 11, 2009 --- Nimsoft and geoXMF today announced that geoXMF has joined the recently launched Nimsoft Unified Monitoring Alliance program to extend and improve performance monitoring solutions for business and government.

With this step, Nimsoft and geoXMF will move traditional GIS management toward a comprehensive, proactive and performance driven industry solution using the Nimsoft Monitoring Solution (NMS) and geoXMF's XMF Alerter™ software. This approach will provide an easy adoption path for businesses and government, enabling them to improve overall enterprise application performance. It will also more quickly enable the creation of new, innovative solutions between the two companies.

“We are pleased to welcome geoXMF and its enterprise GIS performance software, XMF Alerter™, to the Unified Monitoring Alliance. geoXMF is known for its strength and innovation in the enterprise GIS performance space, and this partnership offers strong support for our business,” said John Smith, Nimsoft Vice President of Engineering.

“geoXMF’s stance is that enterprise GIS is now mission-critical IT technology for business and government operations. That means we need to offer solutions that are integrated with the next-generation Nimsoft Unified Monitoring solution. . This partnership will help ensure that enterprise GIS is delivering world-class performance comparable to other mainstream enterprise applications,” said Doran Geise, geoXMF VP.

XMF Alerter™ is a complete enterprise performance monitoring and alerting solution for ESRI GIS. XMF Alerter™ integrates with and enhances ESRI’s industry-standard GIS architecture to deliver a comprehensive tool to improve overall IT efficiency and productivity.

About Nimsoft

Nimsoft is the first provider of Unified Monitoring™ solutions for virtualized datacenters, hosted and managed services, cloud platforms, and SaaS resources. With a proven time to value measured in weeks, the Nimsoft Monitoring Solution™ (NMS) reduces an enterprise's total cost of ownership by up to 80 percent compared to legacy systems management vendors, while scaling and extending to places they just cannot go. The Nimsoft Unified Monitoring architecture eliminates the need to deploy a new monitoring solution for outsourced services, public or private clouds, or SaaS implementations. Nearly 1,000 customers use Nimsoft Unified Monitoring solutions, including both mid-market and global organizations such as Amway Corporation, Barclays Capital, Casual Male, European Medicines Agency (EMA), Ladbrokes, TriNet, and hundreds of leading hosting, cloud and managed service providers such as 1&1, CDW, Hitachi, and Rackspace. For more information, visit www.nimsoft.com. To see Nimsoft Unified Monitoring in action, visit the Nimsoft public portal at www.unifiedmonitoring.com.

About geoXMF

geoXMF LLC is a leader in real-time GIS performance monitoring and services. geoXMF's industry leading technology integrates with ESRI® Internet mapping software and is used by organizations including transportation, real estate/environmental, agriculture, water and wastewater utilities, power distribution and local/regional governments. geoXMF provides products that enable GIS professionals to provide the best management and reporting of their spatial enterprise performance and proactively monitor the key components of their GIS technology stack.

The company's XMF Alerter™ software responds to the growing need for organizations world-wide to maximize enterprise GIS performance and reliability. For more information, please visit our website: www.geoxmf.com
